Complex Trauma Exposure Screen (CTES)

Please indicate whether the child experienced the following types of traumatic events using all available information (e.g. self- or caregiver report, review of records, etc.). Conduct a **brief** interview with the child only if you do not already have enough information to make a determination about complex trauma exposure. To avoid undue distress, ask only about types for which you do not already have information. If information for a particular trauma is known, *do not request additional details from the child* for that type. For example, if the child has a documented history of physical neglect, endorse "Y", and move on to the next category. *Once the presence of 2 or more trauma types has been reported (or 1 lasting greater than 6 months), discontinue the interview portion of the assessment.*
